

Installing Citrix Receiver on Android Devices

1. Click on the “Play Store” Icon. It can be found on the list of Applications or can usually be found on the Main Home Screen.

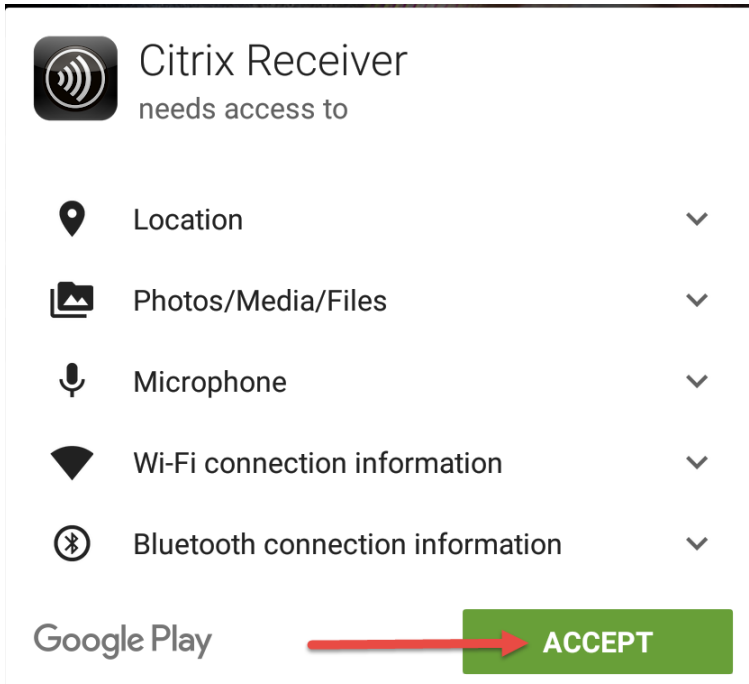

2. Click on the text box to search and type “Citrix Receiver” and click on the Citrix Receiver icon.

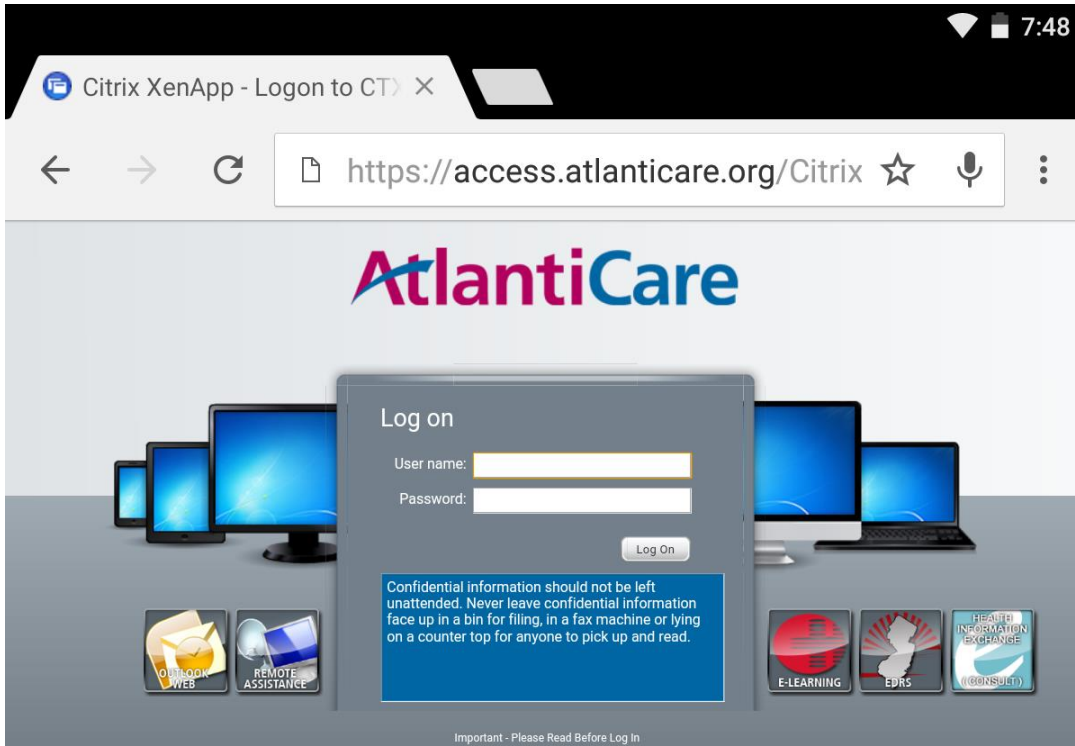

3. Click on the "Install" button.

4. Click "Accept" to the permissions pop-up.

- Once installed, open your Browser and go to <http://access.atlanticare.org> and login with your AD network credentials.

- Click on the application you would like to open.
- Click Open to the Launch.ica, and it will launch the application on your Android device.

This concludes the install and you should be able to launch icons from Citrix (AtlantiCare Access). If you are still having an issue and this is your personal pc or laptop then you will need to contact an outside company for more assistance. Our policies state that we are not allowed to troubleshoot beyond showing users how to download the ICA client.

Thank you,

AtlantiCare Information Technology Department
