

ABDOMINAL PAIN IN SCHOOL-AGE CHILDREN - IT'S NOT JUST IN THEIR HEADS

Tuesday, Oct. 22, 2024

5:00 pm – 6:30 pm

Live Virtual Professional Development Event

Learning Objectives

-  Discuss the common causes of recurrent abdominal pain (RAP) in school-age children
-  Identify red flag symptoms that require more immediate attention
-  Explore how the mind-gut connection impacts most cases of pediatric RAP
-  Identify potential pharmacological, non-pharmacological, and dietary therapies for RAP

Presenters:

Ronen Stein, MD

Associate Professor of Clinical Pediatrics
Division of Gastroenterology, Hepatology,
and Nutrition
Children's Hospital of Philadelphia

Planning Committee and presenters have declared they have no conflict of interest to disclose. There is no commercial support for this program.
